- **Bespoke sizes can be made to suit any space.**
- *Wide selection of RAL colours make up the standard colour range and are available at the prices listed above. For any other RAL colours, which are not in the standard colour range, then a surcharge applies. Please ask for details.
- #The Supermirror is a highly reflective, high heat output radiator that brings light and the illusion of extra space. As the Supermirror is made of highly polished stainless steel, there will be some distortion created during the manufacturing process, particularly around the edges. Although Supermirror won't compete with a glass mirror for the perfect reflection, it's a truly stunning radiator that reflects undeniable star quality.
- All Outline radiators are made to order, please allow around 6-8 weeks for delivery.
- Low Surface Temperature - please be aware, this radiator acts as a convector heater, and emits heat from the space at the top of the radiator between the wall and the rear of the radiator as opposed to the front panel.
- 25mm gap from wall to rear of radiator on all Outline models.
- Electric heating element is non-adjustable. The heating element gradually reduces in power as the temperature rises above 60°C for safe operation. The power cable is located at the bottom right hand corner of the radiator but can be placed behind the radiator facade, so it is out of view (as pictured in the brochure). Towel rails not included as standard - £96 extra.
- Electric element comes with a 2 year manufacturer's warranty and radiator comes with a 5 year manufacturer's warranty.
- Distance wall to front face: shallow radiators (50mm deep) - 75mm (with towel rail - 125mm)
deep radiators (95mm deep) - 120mm (with towel rail - 170mm)
- Nationwide delivery available - usually £25 per consignment.
- Also available in central heating version.
- All sales are subject to our standard terms and conditions, a copy of which can be downloaded from our website

The above prices are exclusive of VAT
