## iRad Round

Price list with effect from 14<sup>th</sup> February 2011

The never-ending outline of the iRad Round brings endless curve appeal to your walls. This exceptional electric radiator runs rings around the others. The iRad Round can be used with a remote control programmer, which allows the user to set temperature and operating times.

**iRads working together as a centrally controlled heating system** - pick and mix from the iRad Round, iRad Picture, iRad Templo and standard iRad range to create the perfect heating system. One iRad Controller is needed for each heating zone.

**iRad as a stand-alone unit** - each radiator has a simple on/off switch. An iRad Controller is not necessary to operate one iRad working alone, but may be desirable for greater control (thermostat and timer).
