

# iRad

Effective from 18<sup>th</sup> January 2016

**iRads working together as a centrally controlled heating system** - pick and mix from the iRads below as well as the iRad Round, iRad Templo and iRad Picture to create the perfect heating system. One iRad Controller is needed for each heating zone.

**iRad as a stand-alone unit** - each radiator has a simple on/off switch. An iRad Controller is not necessary to operate one iRad working alone, but may be desirable for greater control (thermostat and timer).

**iRad – mild steel panel in white, silver, black and RAL colours.**
