

feature radiators

effective from 16th January 2008

7 section gothic in anthracite

GOTHIC

cast iron hand-built using traditional methods
– an inspired archetype.

the gothic cast iron radiator is the preferred choice for many traditionally styled new builds or refurbished period properties with its enormous heat emitting qualities and low maintenance design

below are approximate measurements of assembled radiator sections (end bush to end bush) these are intended as a rough guide only

GOTHIC

663mm high
185mm deep

sections	length mm
3	273
4	354
5	435
6	516
7	597
8	678
9	759
10	840
11	921
12	1002
13	1083
14	1164
15	1245

output		primer £	top coat £
watts	btus		
783	2670	214	228
1044	3560	285	304
1305	4450	357	380
1566	5340	428	455

3654	12,460	998	1063
3915	13,350	1070	1139

Finishes

- Available in *matt metallic finishes* (antique gold, old penny, natural cast iron, anthracite, pewter). Colour card available on request. Shade variations may occur from one paint batch to the next. Where it is imperative that radiators exactly colour match, then such radiators should be ordered together. If you are looking to match the colour of radiators ordered previously, please disclose this at the time of order, so we can do what we can to minimize the variation in shade.
- Warning: please be aware that pewter and other light coloured paint finishes highlight the imperfections characteristic of cast iron more than the darker colours.
- Primer finish available for on site painting or we can deliver direct to your own painter in the UK. We strongly advise against powder coating this product as this process can weaken the seals between sections. Powder coating will invalidate the manufacturer's guarantee.
- These radiators have a textured finish which is characteristic of cast iron. If you are looking for a column style radiator with a smooth finish please see our Classic and Bordo ranges, which are made of steel.

- Approximate pipe centres can be provided if you wish to install your pipework in advance of receiving your radiator. these measurements are intended as a rough guide only
- Radiators are supplied with the necessary fixings i.e. brackets, spacers, air vents etc (note: screws are not supplied)
- To complete the look see our valves page for traditional style valves (valves are not included as standard)
- Nationwide delivery available
- To order or for further information, please call or email
- Heat outputs are shown at operating temperatures of 90/70/20 (Δt60°C)
- All sales are subject to our standard terms and conditions a copy of which is available on request

These prices are exclusive of VAT
