summer heating elements

basic summer heating elements - add £67 to prices above

all electric versions

summer heating elements with adjustable thermostatic control - add £108 to prices above

all electric versions using the basic elements - add £80 to prices above

all electric versions using adjustable thermostatic control - add £115 to prices above

electric elements – the basic elements used in our electric rails and summer heating elements have a built in thermostat and thermal cut out as standard. this can be upgraded to an element with adjustable thermostat. elements are fitted as standard in the right hand side of the towel rail and in the case of electric only towel rails are capped on the left hand side with a chrome plated cap. Can be connected to a fused spur or a 3 pin plug (please allow extra height when electric element is added)

profile valves – specifically designed not to protrude outside the dimensions of the alpine towel rail – polished or satin finish manual valves available in pairs of either angled or straight - £70 (polished), £91 (brushed satin)

- all items usually in stock in the UK and available for next working day delivery
- distance wall to front face – using standard brackets:
 - straight-fronted round tube towel rails = 115mm
 - bow-fronted round tube towel rails (camber and adur): 400 models = 140mm / 520 models = 150mm / 620 models = 165mm
 - straight-fronted square tube rails (brunswick) = 70-95mm
- shorter brackets available at no extra cost, but must be specified at time of order - these reduce the above wall to front face distance by 25mm.
- nationwide delivery available – usually £25 per consignment
- to order or for further information, please call or email
- heat outputs are shown (for central heating radiators) at operating temperatures of 90/70/20 (Δt60°C)
- all sales are subject to our standard terms and conditions a copy of which is available on request or can be downloaded from our website

all prices are exclusive of VAT
