- Sizes and finishes shown in bold: approx 2 – 3 weeks. Other sizes and finishes: approx 6 – 8 weeks.
- Bespoke sizes can be made to suit any space: approx 6 – 8 weeks. Please call for details.
- *Wide selection of other RAL colours also available from the standard colour range and are available at the prices listed above. For any other RAL colours, which are not in the standard colour range, then a surcharge applies. Please ask for details.
- #The Supermirror is a highly reflective, high heat output radiator that brings light and the illusion of extra space. As the Supermirror is made of highly polished stainless steel. There will be some distortion created during the manufacturing process, particularly around the edges. Although Supermirror won't compete with a glass mirror for the perfect reflection, it's a truly stunning radiator that reflects undeniable star quality.
- Low Surface Temperature - this radiator acts as a convective heater, and emits heat from the space at the top of the radiator between the wall and the rear of the radiator as opposed to the front panel.
- 25mm gap from wall to rear of radiator on all outline models.
- One or two towel rails included in price as stated above. Extra rails available for £52.
- Distance wall to front face: Shallow radiators (50mm deep) - 75mm (with towel rail - 125mm)
Deep radiators (95mm deep) - 120mm (with towel rail - 170mm)
- Underside valve connections as standard.
- Side valve connections can be specified at no extra cost.
- To complete the look, see our valves page (valves are not included as standard).
- Nationwide delivery available – usually £25 per consignment.
- To order or for further information, please call or email.
- Heat outputs are shown at operating temperatures of 90/70/20 (Δt60°C).
- All sales are subject to our standard terms and conditions, a copy of which can be downloaded from our website.

The above prices are exclusive of VAT.
