SUPERMIRROR central heating

price list with effect from 22nd November 2010

radiators are pictured not plumbed in (without valves)

The Supermirror is a highly reflective, high heat output radiator that brings light and the illusion of extra space. As the Supermirror is made of highly polished stainless steel, there will be some distortion created during the manufacturing process, particularly around the edges. Although Supermirror won't compete with a glass mirror for the perfect reflection, it's a truly stunning radiator that reflects undeniable star quality.
