## LONGITUBE towel warmer

Made from 100% stainless steel

Price list with effect from 14<sup>th</sup> October 2011

Limited vertical wall space but plenty of towels to dry and warm? Meet the Longitube steel towel warmer, ideal for long low wall spaces. It's simple classic styling and clean lines compliment both traditional and modern settings. The Longitube is made of stainless steel, which is either polished to gleam and dazzle or given a satin finish for a contemporary look.

For use on any central heating or hot water system\*, also available in electric and dual fuel formats. Delivery next working day if ordered before noon / 25 year manufacturer's guarantee

Longitube 750 in polished stainless steel

Longitube 1000 in polished stainless steel

### Central heating version

Model	Height mm	Width Mm	Heat output Watts / BTUs	Polished £	Satin £
N/750	600	750	491 / 1676	247	321
N/1000	600	1000	552 / 1885	278	361

### Dual format version

An optional extra, this electric summer heating element is for use on the central heating rails, to provide warm towels in the summer months when the central heating is turned off.

*Basic summer heating elements - add £67 to central heating prices above.*

*Summer heating elements with adjustable thermostatic control - add £108 to above.*

### Electric version

*With the basic element - central heating prices + £80*

*With element with an adjustable thermostatic control - central heating prices + £115*

**Electric elements** - the basic elements used in our electric rails and summer heating elements have a built in thermostat and thermal cut out as standard. This can be upgraded to an element with adjustable thermostat. Elements are fitted as standard in the right hand side of the towel rail and in the case of electric only towel rails are capped on the left hand side with a chrome plated cap. Can be connected to a fused spur or a 3 pin plug (please allow extra height when electric element is added).

**Profile valves** - specifically designed for use where pipes are coming from the wall, these valves do not protrude outside the dimensions of the Longitube towel rail. Profile manual valves are available in pairs - £70 (polished), £91 (brushed satin). Otherwise, we would recommend using our Minimus range of valves available in both straight and angled versions and polished or satin finishes - £25 per pair.

- All Longitube towel warmers are usually in stock in the UK and are available for next working day delivery.
- Distance wall to front face - using standard brackets: 117mm. Shorter brackets available at no extra cost, but must be specified at time of order (these reduce the above wall to front face distance by 25mm).
- Nationwide delivery available - usually £25 per consignment.
- Heat outputs are shown (for central heating radiators) at operating temperatures of 90/70/20 (Δt60°C)
- \* provided the appropriate valves are used. Please ask for advice.
- All sales are subject to our standard terms and conditions, a copy of which can be downloaded from our website.

**All prices are exclusive of VAT.**
